Customer Churn Distribution

Revenue by Subscription Plan

Churn by Engagement Level (Login Frequency)

## Key Insights

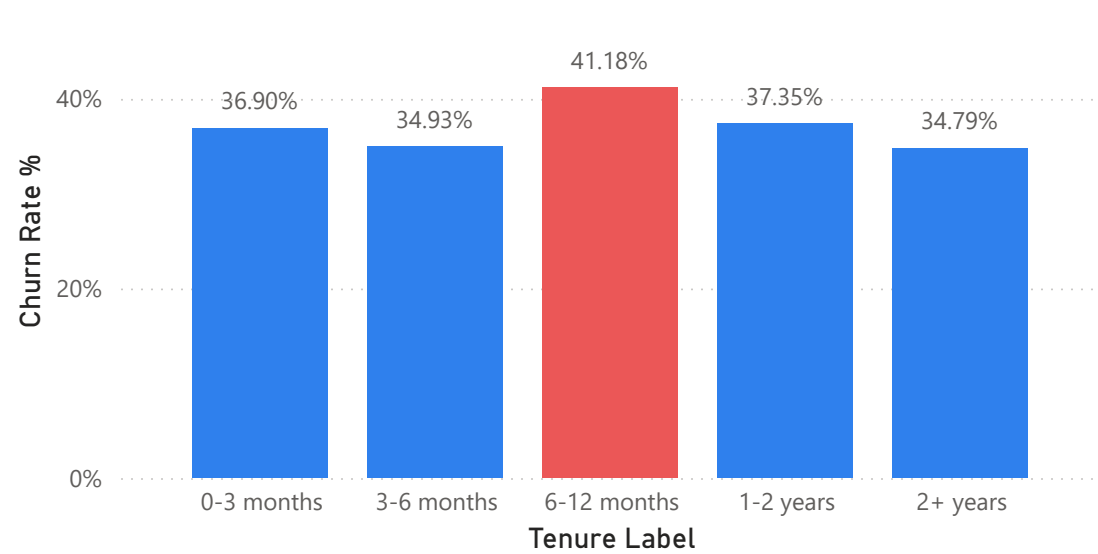

- Churn rate is ~37%, indicating a significant retention issue
- Business and Enterprise plans generate the majority of revenue
- Low-engagement users (rare logins) show the highest churn
- Daily active users are significantly more retained

## Recommendations

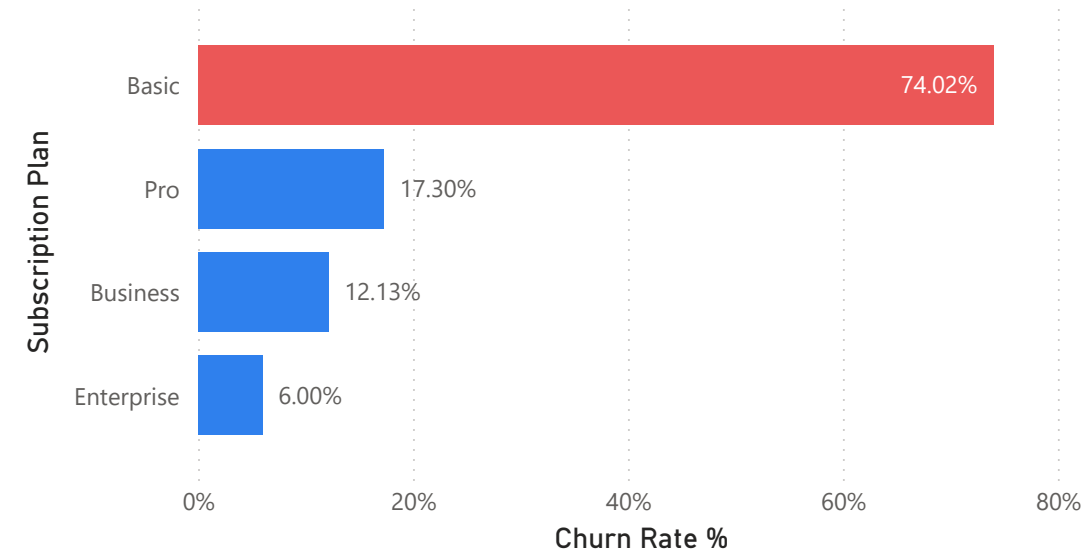

- Improve onboarding experience for new users
- Increase user engagement through product features
- Focus on retaining high-value (premium) customers

# Customer Retention Analysis

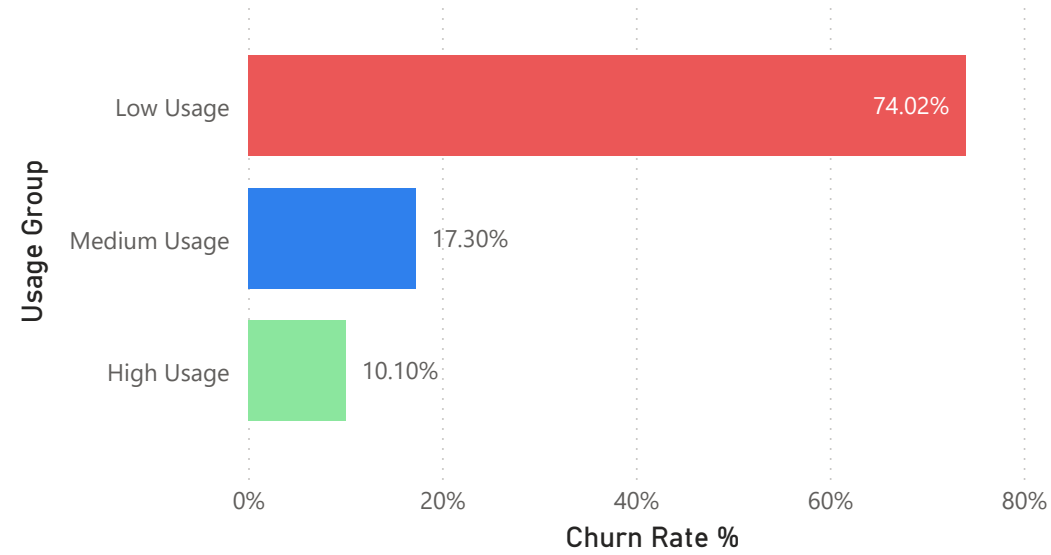

Churn Rate by Customer Tenure

Churn Rate by Subscription Plan

Churn Rate by User Engagement Level

## Key Insight

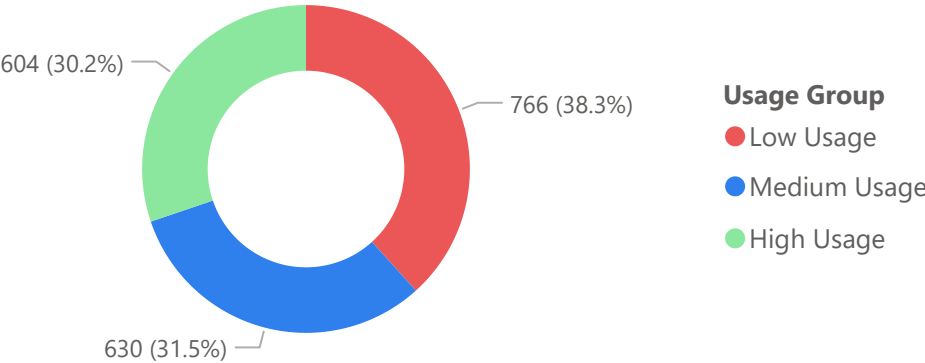

- Churn peaks at mid-tenure (6–12 months), not early stage
- Basic plan users have significantly higher churn (~74%)
- Low engagement is the strongest driver of churn

## Recommendation

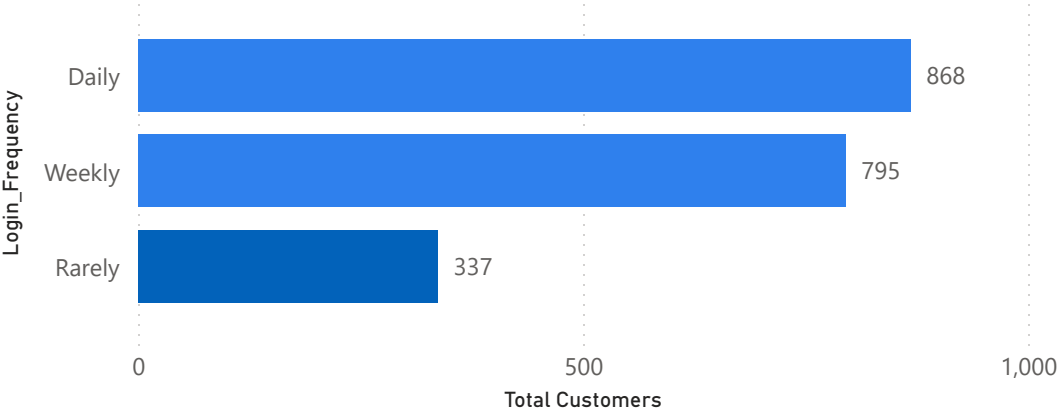

- Improve mid-term engagement strategies
- Enhance value proposition for Basic users
- Encourage frequent usage through product nudges and onboarding improvements.
